

## PROCHECK : STOP SPECIMEN MIX-UPS AND REPLACE MANUAL PROCEDURES

Increase your accuracy and efficiency with an integrated scanning solution that saves time, and by using it will reduce malpractice insurance cost.

ProCheck integrates easily into lab operations and comes in multiple configurations that can be upgraded as lab scanning needs grow. Single

or multi-user standalone mode with internal database, SQL Light, or Microsoft SQL 2008. Multi-device mode allows two technicians to operate independently on the same screen, separate scanners, saving valuable space and resources. All versions allow for centralized admin,

Dual screen operation allowing sharing of one station. HP Thin client located back right.

logging, reporting, specimen search, filing with easy setup.

Scanner optimization features provide start up, login via barcode scan, scan filtering, and audible alerts that speeds the scanning

operation and make for almost hands free operation. ProCheck is designed to save time between scans, speeding the laboratory process forward while increasing accuracy, all with flawless accuracy.

### PROCHECK LAB™ EDITION FEATURES

- Designed for the entire lab with Comparison, and Scan Capture Mode made for Aliquoting, Surepath, Embedding, Histology, Grossing, and Cytology
- Reports: On demand data access for lab managers with search and reports by time, station I.D., type, and user, provides every option in reports
- Replaces repetitive, time consuming, error-prone manual checks and paperwork
- Eliminates specimen mix-ups and ensures result integrity
- Eliminates misidentification of samples in the workflow
- Makes cassette and slide verification easier.
- Dual touch-screen and audible scanning alerts speeds up the scanning and specimen checking process
- Never Forget USB™ One touch setup and forget scanner controls takes the hassle out of setup and support of scanners by saving USB scanner setups
- Handheld Scan Software and search feature for portable devices compatible with certified bluetooth scanners on any WiFi enabled handheld.
- Reduces malpractice insurance cost immediately with savings that can pay for the system in most cases
- Touch Less™ screen features saves more time and allows lab techs to scan barcode on badge to log in and auto advance between slide and cassette eliminating extra touch screen interaction and taking gloves off
- Software available as Standalone, SQL Lite or full Microsoft SQL with conversion tool available to upgrade from DB from SQL Lite to SQL
- Hardware is optimized to run on HP Thin Client with 2gig/2gig with .NET 3.5, EloTouch 15 inch Touch Screen
- Compatible with all existing laboratory numbering systems with administration options to change as need rules for scanning
- Data export by tech day in Excel and report format
- Support: We offer 24 x 7 lab software support and customized product options
